PLEASE READ THE FOLLOWING

- Catawba Moorings actively participates as an environmentally conscious marine. We ask that you use environmentally safe products when preparing and cleaning your boat. We suggest using a piece of plastic, perhaps your old shrink wrap under your boat when sanding to collect dust and chips and dispose in the dumpster.
- You are responsible for cleaning up your own winter storage area. If this work has to be done by our staff, you will be charged time and materials.
- If you are not planning to be present for the launch of your boat, please provide us with 4 dock lines, bumpers to properly secure your boat and the location of your dock and keys.
- For those of you who have an outstanding balance, we will not launch your boat until your account is paid in full.
- Please keep in mind that last minute work request and weather may effect your scheduled launch date.
All work requests may not necessarily be performed at the same time. Bottom painting and hull waxing will be done before launching and oil changes, tune-up and topsides will be done after the boat is in the water. You will receive billing as the work is completed.
- For **Catawba Moorings' Dockers** who change their oil, we offer a waste drum to you at no charge. For this service, you are required to dump your oil into the drum (no oil filters). The waste drum is located on the south side of the Heated Storage building. Catawba Moorings pays to have this oil disposed and it is available to you Monday - Saturday, 8am to 4pm.
- Any necessary towing of boats to the dock space will be charged time and materials. Boats requiring the use of Catawba Moorings' bilge pump will be charged \$15.00 per day.
- Catawba Moorings does not allow outside summer trailer storage. Any trailer, including wave runner trailers, left on premises will be stored inside and charge \$100.00 storage fee.
- For those customer's who need to work on a sailboat mast that is stored on the mast rack, Catawba Moorings will move a mast down, one time only, per season. The mast may stay off the rack to be worked on for up to 10 days.
- "For Sale" signs displayed by the Owner is prohibited on all boats. We do not want transient people unless accompanied by the broker.

Exterior cleaning: Clean the entire boat with a heavy duty cleaner, then rinse and chamois completely.

Interior Cleaning: Clean the showers, heads, galley, wipe down all walls, clean appliances, then vacuum the carpet.

Hullsides: consists of the area from the waterline to the rubrail.

Superstructure: includes all smooth surfaces above the rubrail (including inside the flybridge, aft deck and cockpit on vessels 27' and under*)

Wax inside Flybridge/Aft Deck and/or cockpit & clean vinyl: Vessels 28'+: To wax inside the flybridge/aft deck and/or cockpit and clean and condition the vinyl is available at the above quoted cost.

One Step Process: we will use a buffing wheel and cleaner/wax combination to clean and protect the surface.

Two Step Process: Step one is to buff the smooth surface with a compound to remove oxidation and restore depth and shine. The second step is to apply a protective sealer or wax.

*For safety, non-skid is generally not included in Buffing & Waxing pricesheet price. it can be completed if requested for an additional fee.

** **Hard Top:** To wax the top and bottom of a hard top, there is an additional charge of \$1.75/ft. (length of boat).

*** Vessles that need heavy duty compounding or are greater than 50' should be quoted for accuracy.
